Welcome to Hospice Palliative Care!

This program is designed to empower you by informing you about the rich care that is possible for people diagnosed with life-limiting or progressive illnesses. It will cover the basic terms used in modern Palliative care so that people and their families, friends, and other caregivers have a better understanding of this important pathway of healthcare. The intention is to inform people in order to confidently advocate for their desired care wishes, as well as to offer helpful and accessible resources. This program is presented by Sunni Rochelle from the Philip Aziz Centre for Hospice Care and Emily's House Children's Hospice.

This is a drop in program and registration is not required.

November 2, 2023, 6:30 pm – 8:00 pm
